

LET'S TALK RESEARCH

RETURN TO WORK

The longer an employee is out of work as a result of an illness or injury, the less likely they are to return to work

Research also confirms that by 6 weeks off work, there is a 10%-40% risk of their still being off work at 1 year

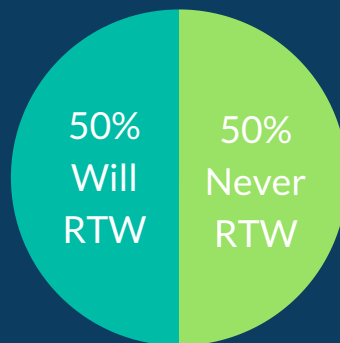

By week 4 of absence, the client/employee has already adopted the disability mindset

1 year absence from work

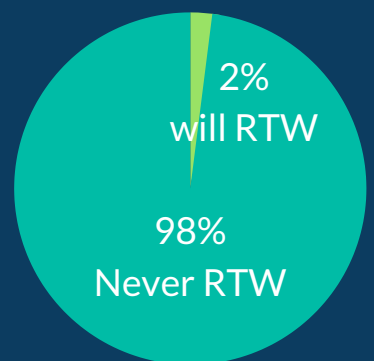

Client has a better chance of being diagnosed with cancer

6 month absence from work

2 year absence from work

The employee is more likely to die or retire
